bart-large-cnn

Beta

Summarization • facebook

`@cf/facebook/bart-large-cnn`

BART is a transformer encoder-encoder (seq2seq) model with a bidirectional (BERT-like) encoder and an autoregressive (GPT-like) decoder. You can use this model for text summarization.

Model Info

Beta

Yes

Unit Pricing

\$0.00 per M input tokens

Usage

✓ Workers - TypeScript

TypeScript

```
export interface Env {  
  AI: Ai;  
}  
  
export default {  
  async fetch(request, env):  
    Promise<Response> {  
    const response = await  
env.AI.run("@cf/facebook/bart-large-cnn", {  
      input_text: "Workers AI allows you to  
run machine learning models, on the  
Cloudflare network, from your own code -  
whether that be from Workers, Pages, or  
anywhere via the Cloudflare API. With the  
launch of Workers AI, Cloudflare is slowly  
rolling out GPUs to its global network. This  
enables you to build and deploy ambitious AI  
applications that run near your users,  
wherever they are.",  
      max_length: 14  
    });  
    return Response.json(response);  
  },  
} satisfies ExportedHandler<Env>;
```

▼ curl

```
curl
```

```
https://api.cloudflare.com/client/v4/accounts/  
large-cnn \  
  -H "Authorization: Bearer {cf_api_token}" \  
  -d '{  
    "input_text": "Workers AI allows you to run  
network, from your own code - whether that be  
Cloudflare API. With the launch of Workers AI,  
global network. This enables you to build and  
near your users, wherever they are.",  
    "max_length": 14  
  }'
```

Parameters

* indicates a required field

Input

- `input_text` **string** required min 1

The text that you want the model to summarize

- `max_length` **integer** default 1024

The maximum length of the generated summary in tokens

Output

- `summary` **string**

The summarized version of the input text

API Schemas

The following schemas are based on JSON Schema

Input

Output

```
{
  "type": "object",
  "properties": {
    "input_text": {
      "type": "string",
      "minLength": 1,
      "description": "The text that you
want the model to summarize"
    },
    "max_length": {
      "type": "integer",
      "default": 1024,
      "description": "The maximum length
of the generated summary in tokens"
    }
  },
  "required": [
    "input_text"
  ]
}
```
