detr-resnet-50

Beta

Object Detection • facebook

@cf/facebook/detr-resnet-50

DEtection TRansformer (DETR) model trained end-to-end on COCO 2017 object detection (118k annotated images).

Model Info

Beta

Yes

Unit Pricing

\$0.0000075 per inference request

Usage

Workers - TypeScript

TypeScript

```
export interface Env {  
  AI: Ai;  
}  
  
export default {  
  async fetch(request, env):  
    Promise<Response> {  
    const res = await  
    fetch("https://cataas.com/cat");  
    const blob = await res.arrayBuffer();  
  
    const inputs = {  
      image: [...new Uint8Array(blob)],  
    };  
  
    const response = await env.AI.run(  
      "@cf/facebook/detr-resnet-50",  
      inputs  
    );  
  
    return new Response(JSON.stringify({  
      inputs: { image: [] }, response }));  
  },  
} satisfies ExportedHandler<Env>;
```

▼ curl

```
curl
https://api.cloudflare.com/client/v4/accounts/
resnet-50 \
-X POST \
-H "Authorization: Bearer $CLOUDFLARE_API_
--data-binary "@pedestrian-boulevard-manha
```

Parameters

* indicates a required field

Input

- 0 **string**

The image to use for detection

- 1 **object**

- image **array**

An array of integers that represent the image data constrained to 8-bit unsigned integer values

- **items** **number**

A value between 0 and 255 (unsigned 8bit)

Output

- ▶ **items** **object**

- **score** **number**

Confidence score indicating the likelihood that the detection is correct

- **label** **string**

The class label or name of the detected object

- **box** **object**

Coordinates defining the bounding box around the detected object

- **xmin** **number**

The x-coordinate of the top-left corner of the bounding box

- **ymin** **number**

The y-coordinate of the top-left corner of the bounding box

- **xmax** **number**

The x-coordinate of the bottom-right corner of the bounding box

- **ymax** **number**

The y-coordinate of the bottom-right corner of the bounding box

API Schemas

The following schemas are based on JSON Schema

Input

Output

```
{
  "oneOf": [
    {
      "type": "string",
      "format": "binary",
      "description": "The image to use
for detection"
    },
    {
      "type": "object",
      "properties": {
        "image": {
          "type": "array",
          "description": "An array
of integers that represent the image data
constrained to 8-bit unsigned integer values",
          "items": {
            "type": "number",
            "description": "A
value between 0 and 255 (unsigned 8bit)"
          }
        }
      }
    }
  ]
}
```

```
]
}
```
