

flux-1-schnell

Text-to-Image • Black Forest Labs

@cf/black-forest-labs/flux-1-schnell

FLUX.1 [schnell] is a 12 billion parameter rectified flow transformer capable of generating images from text descriptions.

Model Info

Unit	\$0.000053 per 512 by 512 tile,
Pricing	\$0.00011 per step

Usage

✓ Workers - Returning a data URI - TypeScript

TypeScript

```
export interface Env {  
  AI: Ai;  
}  
  
export default {  
  async fetch(request, env):  
    Promise<Response> {  
    const response = await  
env.AI.run('@cf/black-forest-labs/flux-1-  
schnell', {  
    prompt: 'a cyberpunk lizard',  
    seed: Math.floor(Math.random() * 10)  
  });  
    // response.image is base64 encoded  
which can be used directly as an <img  
src=""> data URI  
    const dataURI =  
`data:image/jpeg;charset=utf-  
8;base64,${response.image}`;  
    return Response.json({ dataURI });  
  },  
} satisfies ExportedHandler<Env>;
```

✓ Workers - Returning an image - TypeScript

TypeScript

```
export interface Env {  
  AI: Ai;  
}  
  
export default {  
  async fetch(request, env):  
    Promise<Response> {  
    const response = await  
env.AI.run('@cf/black-forest-labs/flux-1-  
schnell', {  
      prompt: 'a cyberpunk lizard',  
      seed: Math.floor(Math.random() * 10)  
    });  
    // Convert from base64 string  
    const binaryString =  
atob(response.image);  
    // Create byte representation  
    const img =  
    Uint8Array.from(binaryString, (m) =>  
m.codePointAt(0));  
    return new Response(img, {  
      headers: {  
        'Content-Type': 'image/jpeg',  
      },  
    },
```

```
    });  
  },  
} satisfies ExportedHandler<Env>;
```

▼ curl

```
curl  
https://api.cloudflare.com/client/v4/accounts/  
forest-labs/flux-1-schnell \\  
-X POST \\  
-H "Authorization: Bearer $CLOUDFLARE_API_TOKEN" \\  
-d '{ "prompt": "cyberpunk cat", "seed": "Random"
```

Parameters

* indicates a required field

Input

- prompt **string** required min 1 max 2048

A text description of the image you want to generate.

- **steps** **integer** default 4 max 8

The number of diffusion steps; higher values can improve quality but take longer.

Output

- **image** **string**

The generated image in Base64 format.

API Schemas

The following schemas are based on JSON Schema

Input

Output

```
{  
  "type": "object",  
  "properties": {  
    "prompt": {  
      "type": "string",  
      "minLength": 1,  
      "maxLength": 2048,  
      "description": "A text description  
of the image you want to generate."  
    },  
    "steps": {  
      "type": "integer",  
      "default": 4,  
      "maximum": 8,  
      "description": "The number of  
diffusion steps; higher values can improve  
quality but take longer."  
    }  
  },  
  "required": [  
    "prompt"  
  ]  
}
```
