

lucid-origin

Text-to-Image • Leonardo

@cf/leonardo/lucid-origin

Lucid Origin from Leonardo.AI is their most adaptable and prompt-responsive model to date. Whether you're generating images with sharp graphic design, stunning full-HD renders, or highly specific creative direction, it adheres closely to your prompts, renders text with accuracy, and supports a wide array of visual styles and aesthetics – from stylized concept art to crisp product mockups.

Model

Info

Unit	\$0.007 per 512 by 512 tile,
Pricing	\$0.00013 per step

Usage

✓ Workers - TypeScript

TypeScript

```
export interface Env {  
  AI: Ai;  
}  
  
export default {  
  async fetch(request, env):  
    Promise<Response> {  
  
    const inputs = {  
      prompt: "cyberpunk cat",  
    };  
  
    const response = await env.AI.run(  
      "@cf/leonardo/lucid-origin",  
      inputs  
    );  
  
    return new Response(response, {  
      headers: {  
        "content-type": "image/jpg",  
      },  
    });  
  },  
} satisfies ExportedHandler<Env>;
```

▼ curl

```
curl
https://api.cloudflare.com/client/v4/accounts/
origin \
-X POST \
-H "Authorization: Bearer $CLOUDFLARE_API_TOKEN" \
-d '{ "prompt": "cyberpunk cat" }'
```

Parameters

* indicates a required field

Input

- prompt **string** required min 1

A text description of the image you want to generate.

- guidance **number** default 4.5 min 0 max 10

Controls how closely the generated image should adhere to the prompt; higher values make the image

more aligned with the prompt

- **seed** **integer** min 0

Random seed for reproducibility of the image generation

- **height** **integer** default 1120 min 0 max 2500

The height of the generated image in pixels

- **width** **integer** default 1120 min 0 max 2500

The width of the generated image in pixels

- **num_steps** **integer** min 1 max 40

The number of diffusion steps; higher values can improve quality but take longer

- **steps** **integer** min 1 max 40

The number of diffusion steps; higher values can improve quality but take longer

Output

- **image** **string**

The generated image in Base64 format.

API Schemas

The following schemas are based on JSON Schema

Input

Output

```
{  
  "type": "object",  
  "properties": {  
    "prompt": {  
      "type": "string",  
      "minLength": 1,  
      "description": "A text description  
of the image you want to generate."  
    },  
    "guidance": {  
      "type": "number",  
      "default": 4.5,  
      "minimum": 0,  
      "maximum": 10,  
      "description": "Controls how  
closely the generated image should adhere to  
the prompt; higher values make the image more  
aligned with the prompt"  
    },  
    "seed": {  
      "type": "integer",  
      "minimum": 0,  
      "description": "Random seed for  
reproducibility of the image generation"  
    }  
  }  
}
```

```
    },  
    "height": {  
      "type": "integer",  
      "minimum": 0,  
      "maximum": 2500,  
      "default": 1120,  
      "description": "The height of the  
generated image in pixels"  
    },  
    "width": {  
      "type": "integer",  
      "minimum": 0,  
      "maximum": 2500,  
      "default": 1120,  
      "description": "The width of the  
generated image in pixels"  
    },  
    "num_steps": {  
      "type": "integer",  
      "minimum": 1,  
      "maximum": 40,  
      "description": "The number of  
diffusion steps; higher values can improve  
quality but take longer"  
    },  
  },  
}
```

```
    "steps": {  
      "type": "integer",  
      "minimum": 1,  
      "maximum": 40,  
      "description": "The number of  
diffusion steps; higher values can improve  
quality but take longer"  
    },  
    "required": [  
      "prompt"  
    ]  
  }  
}
```
