

Delete objects

You can delete objects from your bucket from the Cloudflare dashboard or using the Wrangler.

Delete objects via the Cloudflare dashboard

1. In the Cloudflare dashboard, go to the **R2 object storage** page.

Go to **Overview** [↗](#)

2. Locate and select your bucket.
3. Locate the object you want to delete. You can select multiple objects to delete at one time.

4. Select your objects and select **Delete**.
5. Confirm your choice by selecting **Delete**.

Delete objects via Wrangler

Warning

Deleting objects from a bucket is irreversible.

You can delete an object directly by calling `delete` against a `{bucket}/{path/to/object}`.

For example, to delete the object `foo.png` from bucket `test-bucket`:

```
wrangler r2 object delete test-  
bucket/foo.png
```

```
Deleting object "foo.png" from bucket  
"test-bucket".  
Delete complete.
```
