Hugging Face Chat UI

Use Workers AI with [Chat UI ↗](#), an open-source chat interface offered by Hugging Face.

Prerequisites

You will need the following:

- A [Cloudflare account ↗](#)
- Your [Account ID](#)
- An [API token](#) for Workers AI

Setup

First, decide how to reference your Account ID and API token (either directly in your `.env.local` using the `CLOUDFLARE_ACCOUNT_ID` and `CLOUDFLARE_API_TOKEN` variables or in the endpoint configuration).

Then, follow the rest of the setup instructions in the [Chat UI GitHub repository](#) ↗.

When setting up your models, specify the `cloudflare` endpoint.

```
{
  "name" : "nousresearch/hermes-2-pro-mistral-7b",
  "tokenizer": "nousresearch/hermes-2-pro-mistral-7b",
  "parameters": {
    "stop": ["<|im_end|>"]
  },
  "endpoints" : [
    {
      "type": "cloudflare",
      // optionally specify these if not
      included in .env.local
      "accountId": "your-account-id",
      "apiToken": "your-api-token"
      //
    }
  ]
}
```

Supported models

This template works with any [text generation models](#) that begin with the @hf parameter.
