Parameters

* indicates a required field

Input

- input required

- **string**

Responses API Input messages. Refer to OpenAI

- 1 **array**

- reasoning **object**

- effort **string**

Constrains effort on reasoning for reasoning models. Currently supported values are low, medium, and high. Reducing reasoning effort can result in faster responses and fewer tokens used on reasoning in a response.

- summary **string**

A summary of the reasoning performed by the model. This can be useful for debugging and understanding the model's reasoning process. One of auto, concise, or detailed.

Output

- 0 **object**
