

Data migration

Quickly and easily migrate data from other cloud providers to R2. Explore each option further by navigating to their respective documentation page.

Name	Description	When to use
Super Slurper	Quickly migrate large amounts of data from other cloud providers to R2.	• For one-time, comprehensive transfers.

Sippy

Incremental data migration, populating your R2 bucket as objects are requested.

- For gradual migration that avoids upfront egress fees.
- To start serving frequently accessed objects from R2 without a full migration.

For information on how to leverage these tools effectively, refer to [Migration Strategies](#)
